About CertFirst

CertFirst is a globally integrated knowledge solutions provider, partnering with leading vendors to deliver high-quality, impactful professional training. Our programs empower organizations to stay competitive in a rapidly evolving technological landscape by equipping their workforce with critical skills.

Key Training Areas

- **Project Management:** Master industry-standard methodologies for efficient project delivery.
- **Open Source:** Harness open-source technologies for innovation and cost-effectiveness.
- **Software and Application Development:** Build expertise in modern development frameworks and practices.
- **Information Security:** Strengthen cybersecurity with training in threat management, compliance, and Biometrics.
- **Biometrics:** Implement secure identity verification using advanced biometric technologies.
- **Artificial Intelligence:** Leverage AI tools and techniques for automation, analytics, and decision-making.
- **Additional Domains:** Tailored solutions to address diverse enterprise needs.

Why CertFirst?

- **Vendor Partnerships:** Collaborate with top-tier vendors to ensure cutting-edge training content.
- **Global Reach:** Deliver customized training solutions worldwide to meet diverse needs.
- **Competitive Advantage:** Equip employees with skills to adapt to evolving technologies and maintain a competitive edge.
- **Tailored Programs:** Design training to address specific business challenges and goals.

Value Proposition

Leading organizations continuously evaluate business processes and employee performance to stay ahead. CertFirst supports enterprises by providing world-class training in critical areas like Biometrics and Artificial Intelligence, ensuring workforces remain agile, effective, and aligned with technological advancements. Our solutions drive performance, innovation, and compliance.

Become a Cybersecurity Leader with CCISO

The Certified Chief Information Security Officer (CCISO) certification by EC-Council is a premier credential for aspiring and current CISOs. Designed by industry-leading CISOs, it bridges technical expertise with executive management skills, focusing on aligning information security programs with organizational goals. This globally recognized, ANSI-accredited certification is mapped to the NICE Cybersecurity Workforce Framework, making it ideal for professionals aiming for top-tier information security leadership roles.

Elevate Your Career with CCISO

The CCISO certification validates real-world experience for C-level information security roles, covering governance, risk management, security controls, program management, and strategic planning. It equips professionals to manage enterprise-wide cybersecurity challenges and offers access to the exclusive CCISO Hall of Fame for outstanding alumni.

Achieving CCISO enhances earning potential, with CISOs often commanding salaries above **\$150,000 annually**.

Five Core Domains of CCISO

The CCISO Body of Knowledge is structured around five critical domains, each integrating essential technical and managerial skills for CISO success:

1. Governance, Risk, and Compliance (16%)
2. Information Security Controls, Compliance, and Audit Management (20%)
3. Security Program Management and Operations (20%)
4. Information Security Core Competencies (22%)
5. Strategic Planning, Finance, Procurement, and Vendor Management (22%)

Domain 1: Governance, Risk, and Compliance (16%)

Program Management

Define, implement, and manage an information security governance program tailored to organizational goals and leadership.

Strategic Alignment

Align governance with organizational goals, leadership style, and policies, ensuring seamless integration.

Risk & Compliance

Understand information security drivers and compliance frameworks, managing enterprise compliance programs and risk assessments effectively.

Domain 2: Controls, Compliance, and Audit Management (20%)

Control Implementation

Design and implement robust information security controls to effectively mitigate organizational risks.

Audit & Certification

Conduct comprehensive compliance audits and manage certification programs to ensure adherence to standards.

Performance Monitoring

Monitor and measure control performance using Key Performance Indicators (KPIs) and manage audit processes.

Domains 3 & 4: Program Management and Core Competencies

Domain 3: Security Program Management and Operations (20%)

Develop and manage security programs aligned with business objectives. Oversee daily operations, incident response, and comprehensive threat management strategies.

Domain 4: Information Security Core Competencies (22%)

Master essential skills like encryption, penetration testing, and vulnerability management. Implement robust threat intelligence and incident reporting processes for proactive defense.

Domain 5: Strategic Planning and Vendor Management (22%)

- **Strategic Security Plans**
Develop comprehensive strategic security plans that are fully aligned with overarching business goals.
- **Financial Management**
Manage budgets, conduct precise financial planning, and oversee all vendor contracts.
- **Procurement Oversight**
Supervise procurement processes for all essential security resources, ensuring optimal acquisition.
- **Enterprise Alignment**
Ensure all security initiatives are perfectly aligned with broader enterprise objectives and strategies.

CCISO Exam Details

1

Exam Format

150 multiple-choice questions in 2.5 hours, covering Knowledge, Application, and Analysis.

2

Eligibility

5 years experience across all 5 domains without training, or 5 years in 3 domains with EC-Council training.

3

Associate C|CISO

For less experienced candidates with 2 years in 1 domain or relevant certifications (CISSP, CISM).

Target Audience for CCISO

Aspiring & Current CISOs

Seeking executive-level expertise and strategic leadership roles in information security.

Experienced Professionals

Information security professionals with 5+ years of experience aiming for career advancement.

IT Managers & Leaders

IT managers transitioning into strategic security roles, responsible for aligning security with business goals.
