

Certified Biometrics Security Professional Institute

<https://biocertification.com/>

About Biocertification

Biocertification offers an international, vendor-neutral biometric security training and certification program for technology professionals in one of the fastest-growing areas of information security.

◆ **Experience**

Providing certification and training programs since 2003 - Check out our Success Stories!

◆ **Applicability**

Ensure that you receive in-depth knowledge that you can immediately apply to real-world challenges.

◆ **Credibility**

Receive a vendor-neutral and independent certification that demonstrates your competency.

◆ **Flexibility**

Choose from a variety of instruction methods, including instructor-led and virtual live.

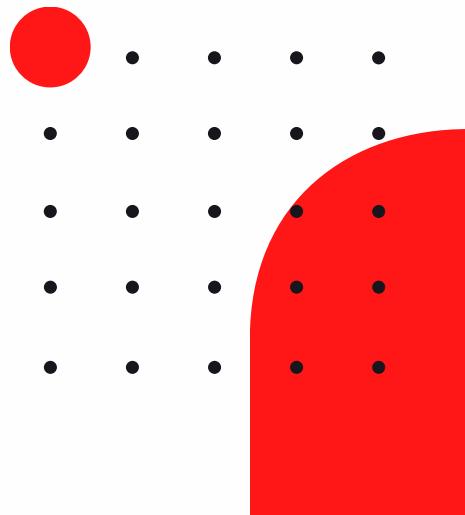

◆ **Expertise**

The program is managed and delivered by a team of subject matter experts and security industry professionals with extensive industry experience.

Certified Biometrics Security Developer (CBSD)

CBSD designates knowledgeable technology professionals in the field of biometric security. This program is designed for those who wish to gain a solid understanding of biometric technologies and apply concepts and COTS tools to improve logical and physical access control in identity management systems. Ideal candidates for this program include security architects, Software & Application Developers, Security Engineers, information assurance consultants, Program & Project Managers and other individuals with experience and expertise in information security related domains. Prior application and software programming experience is required.

Modules

- 1. Authentication Technologies**
- 2. Biometric Functions**
- 3. Biometric Errors**
- 4. Fingerprint Recognition**
- 5. Facial Recognition**
- 6. Iris Recognition Systems**
- 7. Voice Recognition**
- 8. Vein Pattern Recognition**
- 9. Hand Geometry Recognition**

Certified Biometrics Security Developer (CBSD)

- 10. Dynamic Signature Verification**
- 11. Keystroke Dynamics**
- 12. Other Technologies**
- 13. Multimodal Biometrics**
- 14. Independent Evaluations**
- 15. Biometric Standards**
- 16. Biometric Technology Integration**
- 17. Biometrics, Smartcards & PKI**
- 18. Privacy Concerns**
- 19. Government Implementations**
- 20. Private Sector Implementations**

Recommended experience -

- FOR WINDOWS DEVELOPMENT technical experience in C# , C++, C, JAVA, Vb.Net**
- FOR LINUX DEVELOPMENT technical experience in C++, Objective-C, Java**
- FOR MAC DEVELOPMENT technical experience in Java, Objective C**

Includes Free Flash Cards, eBook, Practice Exam

Certified Biometrics Security Professional (CBSP)

CBSP is a foundation-level certification program for technology and security professionals who wish to gain a solid understanding of biometric technologies and their usage in real-world applications. This program is a starting point for individuals wanting to gain a deeper knowledge of biometric technologies and applications.

Modules

- 1. Biocertification CBSP Introduction**
- 2. Introduction to Biometrics**
- 3. Biometrics Systems**
- 4. Biometric System Performance**
- 5. FBI-NGI-IAFIS**
- 6. Biometric Standards**
- 7. Fingerprint Recognition**
- 8. Face Recognition**
- 9. Iris Detection**
- 10. Vein Recognition-VPR**

Certified Biometrics Security Professional (CBSP)

- 11. Hand Geometry Recording**
- 12. DNA Recognition**
- 13. Gait Recognition**
- 14. Keystroke Dynamics**
- 15. Multimodal Systems**
- 16. Palm Print**
- 17. Privacy and Laws**
- 18. Retina Scanning**
- 19. Signature Biometrics**
- 20. Speech and Voice Recognition**

Recommended experience -

CompTIA Security+ training or certification is highly recommended but not required. Candidates who wish to gain knowledge in CompTIA security+ may attend our online course to gain the required knowledge. Please visit the link provided here.

Includes Free Flash Cards, eBook, Practice Exam

Certified Biometrics Security Engineer (CBSE)

CBSE designates knowledgeable technology professionals in the field of biometric security. This program is designed for those who wish to gain a solid understanding of biometric technologies and apply concepts and design principles to improve logical and physical access control in identity management systems. Ideal candidates for this program include security architects, security engineers, information assurance consultants, program managers, and other individuals with experience and expertise in information security-related domains.

Modules

- 1. Biocertification CBSP Introduction**
- 2. Introduction to Biometrics**
- 3. Biometrics Systems**
- 4. Biometric System Performance**
- 5. FBI-NGI-IAFIS**
- 6. Biometric Standards**
- 7. Fingerprint Recognition**
- 8. Face Recognition**
- 9. Iris Detection**
- 10. Vein Recognition-VPR**

Certified Biometrics Security Engineer (CBSE)

- 11. Hand Geometry Recording**
- 12. DNA Recognition**
- 13. Gait Recognition**
- 14. Keystroke Dynamics**
- 15. Multimodal Systems**
- 16. Palm Print**
- 17. Privacy and Laws**
- 18. Retina Scanning**
- 19. Signature Biometrics**
- 20. Speech and Voice Recognition**
- 21. Biometrics as a Service**
- 22. Biometrics and Border Security**
- 23. Biometrics and Cybersecurity**

Recommended experience -

CBSP and CompTIA Security+ training or certification are highly recommended but not required. Candidates who wish to gain knowledge in CompTIA security+ may attend our online course to gain the required knowledge.

Includes Free Flash Cards, eBook, Practice Exam

Clients Testimonials

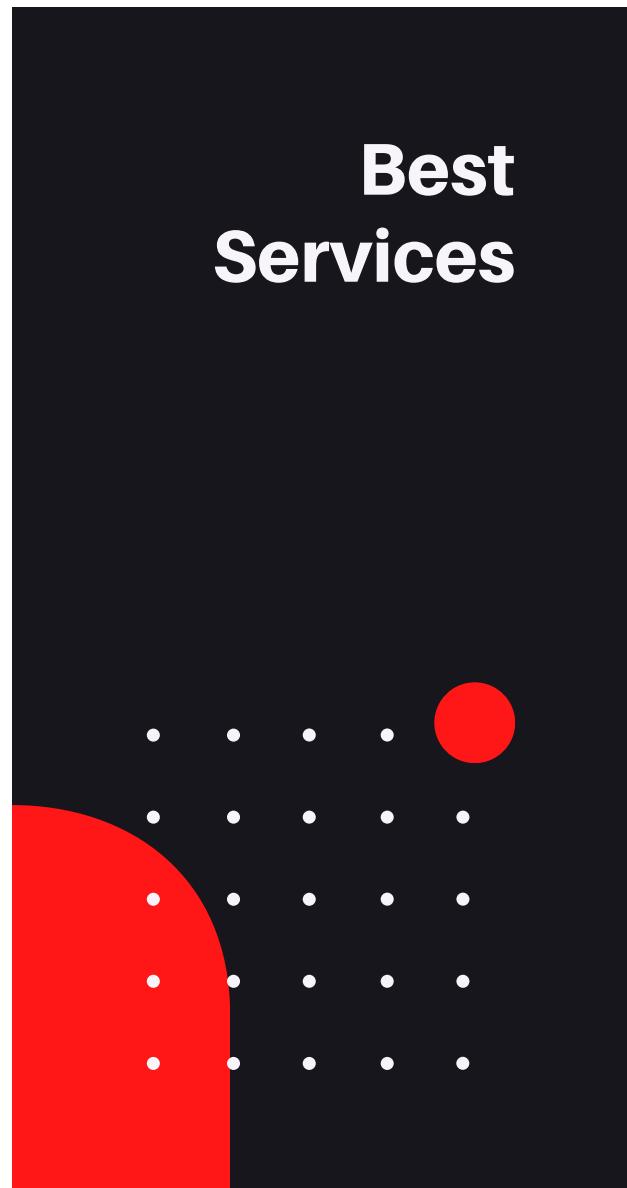

It was a great course where I have learned many things about the Biometrics Domain. Few things I knew few things I thought I know but everything combined was a great learning experience. Thank You.

James

Biocertification has successfully designed multiple, highly sophisticated, training plans for my organization; always keeping our goals and budget as top priorities

A. Ansari, Biometrics SME
